

Third Call for Papers — 2019 Australian Combustion Symposium

The *2019 Australian Combustion Symposium* will be held 4–6 December. The organising committee cordially invite you to the Stamford Grand in Adelaide's iconic Glenelg beach precinct. We are delighted to announce that Prof. Epaminondas Mastorakos will deliver the Bilger Lecture.

The biennial meeting is Australia's preeminent conference in the field of combustion, and builds on a long-standing series of events, including Sydney (2017), Melbourne (2015) and Perth (2013). The conference will be a precursor to the prestigious *38th International Symposium on Combustion*, which will also be in Adelaide. Both meetings are held under the auspices of the Australia and New Zealand section of the Combustion Institute.

The conference will feature a combination of oral presentations and posters, from a range of topics related to combustion, and associated energy-related fields, including:

- Gas-Phase Reaction Kinetics
- Soot, Nanomaterials, and Large Molecules
- Laminar Flames
- Turbulent Flames
- Spray, Droplet, and Supercritical Combustion
- Detonations, Explosions, and Supersonic Combustion
- Solid Fuel Combustion
- Fire Research
- Stationary Combustion Systems and Control of Greenhouse Gas Emissions
- Internal Combustion Engines
- Gas Turbine and Rocket Engine Combustion
- Other Concepts

NEW!

Presenters may choose to have their paper not included in the proceedings. This has been introduced to alleviate concerns around self-plagiarism, in the event the conference paper is subsequently submitted to a journal. If you want your paper to be excluded from the proceedings, please include the text "PRESENTATION ONLY" above the title on the first page of the paper. The maximum length of papers is four (4) pages.
